

EXCELLENCE

“The adaptable chair solution,
designed for multiple users”

Dr Hilary Jones
Our In-house Health Advisor

COMFORT WITHOUT COMPROMISE

**Considered users,
those who require:**

- Postural support
- Pressure care management
- Transfer and portering

Suitable for:

Home

Healthcare

Nursing and
Residential Homes

The Multi range is an innovation in dynamic frame and chair design providing a cost effective solution to the demands of changing care needs, infection control and efficiency.

These chairs can be fully adapted by the healthcare team in the home or on the ward. Each chair can be quickly and easily customised for different users or for an individual as their care needs change over time.

The Multi frame and full range of compatible cushions gives you complete flexibility and control. You choose the right height and seat cushion and the right back rest for the individual you are caring for. Adapt the chair over time to provide more support and pressure care or redesign the chair for a new person. The Multi range just keeps on working.

The Multi Flex is our Multi Porter chair, we also have Bariatric and standard recliner and Standard styles in the Multi range.

COMFORT WITHOUT COMPROMISE

Multi FLEX

The Multi Flex an innovative and dynamic design that solves the challenge of continual changing care demands.

- Adapt the Multi Flex for any size or shape of individual with interchangeable waterfall or lateral back cushions.
- Support different posture requirements and positions with alternative back cushions and additional headrests and pillows.
- Manage specific comfort and pressure management needs with interchangeable seat cushions constructed from a range of specialist pressure care materials.
- Control infections by choosing from our range of healthcare grade fabrics.
- Maintain the highest hygiene standards with quick change covers and replacement cushions.
- Purchase replacement or new support cushions as you need them to extend the use of your Multi Flex.

Key features

- 1 The Push Handle comes with rubber grips and a lever to adjust the angle of the chair back into a reclined position. The position locks when the lever is released.
- 2 Separate waterfall back cushions can be individually repositioned for comfort and support.
- 3 Back cushions can be removed and replaced with a more supportive lateral style.
- 4 Back and seat cushions are upholstered in vapour permeable multi-way stretch fabric, to aid pressure care. The fabric is washable at 95°C and available in a range of colours.
- 5 Tilt the seat for comfort and support with a range of seat positions 10°, 15° and 20° options. Reflexions memory foam and the contoured seat help disperse weight on pressure areas.
- 6 D Rings.
- 7 Choose internal seat cushions from a range of pressure care management solutions.
- 8 Reduce the seat depth by adjusting the sliders.
- 9 Sliding footplate, padded and with a removable cover.
- 10 Heavy duty lockable castors.

Standard features

Push Handle with lever

Reclined back angle

Adjustable seat depth

D ring

The **Multi Flex**, the hardest working porter available.
An **effective, efficient** and **value for money** solution.

Repose Multi Flex options for pressure management

All cushions are covered in multi-way stretch, vapour permeable fabric which is wipeable, removable, washable at 95°C, incontinence proof and breathable.

Viscoform

- Memory foam (std)
- Reflex foam

Pressure Risk

LOW MEDIUM

For those who have good posture and mobility but are seated for greater than one hour at a time and require pressure relief and supported comfort.

This cushion has a high density foam base which offers a supportive and firm seat base with a top layer of memory foam to allow submersion into the cushion giving stability and a large surface area to reduce pressure levels.

Liquiform

- Memory foam
- Liquid gel sac
- Reflex foam

Pressure Risk

MEDIUM HIGH

For those who have good posture and mobility but are seated for long periods of time and require pressure relief and supported comfort. Excellent for people with little fatty tissue.

This cushion has a high density foam base which offers a supportive and firm seat base topped with a fluid liquid gel in a soft silicone cover to provide high levels of pressure relief. The liquid gel helps to dissipate heat and constantly adapts to movement.

Celliform

- Gelacell mesh gel
- Reflex foam

Pressure Risk

MEDIUM HIGH

For those sitting for long periods of time with specific comfort issues such as a high risk of pressure sores and shear forces.

Gelacell's unique grid design eliminates pressure points by contouring in response to the transfer of weight and evenly distributing pressure. The molecular structure restricts absorbed heat and keeps the seat cooler and fresher.

Airform

- Memory foam
- 3 x manual air cushions
- Reflex foam

Pressure Risk

HIGH

For those who have good postural position but who are unable to alter their own position easily and require high level pressure care.

This cushion gives the benefit of an air cushion without the sensation of alternating changes in air pressure.

Pressure mapping

All Repose seat designs undergo rigorous pressure mapping testing to ensure we achieve the highest standards possible. A mat of pressure sensors is applied to the seat. The matrix of sensors quantifies the surface pressure between a person and the support surface the chair provides. The results provide a map for analysis by clinicians who can then advise our design teams. The aim is to ensure that pressure is as evenly distributed as possible and that the maximum area of the thighs and buttocks is supported as at low an interface pressure as possible.

Poor pressure distribution

Good pressure distribution

Pressure Map for individual: Gender: Female; Age: 35 Years; Weight: 10.5 Stones.

Note: Users with pressure relief needs or concerns are advised to seek the advice of a tissue viability clinician on the most suitable level of pressure relief for their medical requirements.

COMFORT WITHOUT COMPROMISE

Back cushion options for enhanced support

Waterfall back cushion

Individual waterfall cushions, which are fully adjustable for maximum postural support.

Full foam lateral back cushion

A foam filled back providing firmer lateral support. A head pillow or small profile headrest is recommended with this style back.

Optional extras

Small head pillow

(image for illustration purposes only).

Small profile headrest

(image for illustration purposes only).

Lapstrap and pad

Connecting straps for leg block support

Leg block support with braked castors

Contact areas are contoured with memory foam for maximum comfort.

Large profile headrest

Care features

Interchangeable seat cushions to adapt the Multi Flex for each new user's pressure care or support needs.

Easy to remove back cushions allowing the flexibility for the back cushion to be changed or upgraded.
