G-Trac™
Technology

Freedom of movement

The *Invacare* ***Spectra***^{XTR} has been developed to combine powerful driving performance with comfort. High torque motors and a unique suspension design provide a smoother, easier ride. The interchangeable seating systems offer unrivalled flexibility and modularity, this feature coupled with a new easy to remove cable free battery system makes the ***Spectra***^{XTR} extremely quick and simple to service.

Driving performance and comfort

The **Spectra** XTR has a specially designed suspension system. The springs are mounted centrally under the seat and attach to a long swing arm which improves traction and enhances outdoor performance and comfort. **Spectra** XTR is available in two speeds 6 and 10 km/h. Its compact dimensions offers excellent manoeuvrability, and the chair's width can be reduced below 59 cm. Plus the seat riser option further increases accessibility by offering a total raised height of 30cm.

Modularity – functional and adaptable

Powered wheelchairs are often used for long periods of time, with three interchangeable seating systems offering a wide range of seating options the **Spectra** XTR offers a tailor made solution for comfort and positioning.

Serviceability and transportability

With a clever and robust mechanism for detaching the seat from the wheelbase, transportation, storage and servicing are rendered refreshingly trouble-free. Just one cable has to be disconnected when taking the **Spectra** XTR apart. To make servicing even easier, the cable free batteries slide out smoothly and without effort.

Features and Options

Removable seat unit
Pull a strap, lift the seat and disconnect the remote cable in order to take the seat off. It couldn't be easier!

Lock back kerb rider
The kerb rider can be locked back out of the way during transfer.

Removable batteries
Separate cable free battery boxes slide in and out without any effort. High-end sockets connect automatically.

Different applications
Choice of two castor sizes depending on customer requirements.

Features and Options

Narrow width
The total width with the option of small castors is below 59 cm.

Spring for suspension
A comfortable drive and safe traction are ensured even at high speeds.

Standard seat
Features tension adjustable backrest for individual support.

Firm seat unit
Padded robust seating. Cross compatible with the well known *Spectra Plus* seat.

Flex II seat
A comfort style seat supporting good posture. Cross-compatible with the well known *Rea* seat.

Swing out anti tippers
A useful feature for storing the wheelbase.
